

HYDRAULIC

TOOL CIRCUIT GENERATOR

What Is The Tool Circuit Generator

The PROPRIETARY Tool Circuit Generator (TCG) is a hydraulically driven, PORTABLE AC generator, that utilizes the "Auxiliary Tool Circuit" on a work truck or any other vehicle as the fuel source.

Using the TCG provides **TREMENDOUS BENEFITS TO YOUR FLEET OR RENTAL YARD!**

Why Do I NEED The Tool Circuit Generator

The TCG eliminates a "Secondary" gas engine generator on-board every work truck. Advantages of the TCG are its 50% lighter, 50% smaller, virtually maintenance free, has no bad fuel to deal with and produces no excessive noise!

Is It a Hassle To Switch From Gas To Hydraulic Generators

Absolutely not! The TCG is less of a hassle for you in the long run. Additional fuel, on-going maintenance, and theft with gas generators; now that's a hassle! Plus, with Boss, getting your fleet equipped is easy. The Tool Circuit Generator only requires 6-8 GPM, like most hydraulically driven tools; plug and play simplicity.

Integration Into Your Existing Fleet

- Can be specified into new equipment, existing equipment or **RENTAL FLEETS**.
- Portable design means you can move it from truck to truck.
- There when you need it, out of the way when you don't.
- The Tool Circuit Generator is competitive with gas generators, and easy to install.
- Space, money, and weight, without sacrificing *simple, reliable, mobile AC power.*

Tool Circuit Generator Advantages

- Can be checked out like any other hydraulic tool
- 50% smaller & lighter than gas generators
- Virtually maintenance free
- Has no gas emissions
- Less noise and vibration
- No bad fuel
- No messy exhaust
- Built in handle for easy transport

Specifications

- Rating: 4 kW
- Length: 19.53"
- Depth: 7.38"
- Height: 11.06"
- Weight: 55 lbs.
- 20 amp 120 Volt duplex outlet
- 30 amp 240 Volt Twist-Lock - NEMA L14-30
- 20 amp thermal breakers
- Analog voltmeter
- Flow: 6-8 gpm
- Max Pressure: 3,000 psi
